To Whom It May Concern

It is my honor to recommend Mr. Ameer Hamza Manzoor for admission into the Postgraduate program at your institute. I have had the pleasure to know and work with him for the last 10 months. He first worked with me as a Mobile App Developer in the M/S: Ranglerz at Lahore.

He brings to all his activity's energy, enthusiasm, and commitment. This is to be expected in any successful member of an entrepreneurial organization. The crafting of a Mobile Apps design and hierarchy, or the establishment of best practices with an emerging React Native technology, he consistently delivers high-quality software for our organization. This speaks to his overall intellect and ability to learn, attributes that will serve him well in his study.

While he is a relatively junior member of our organization as measured by tenure, he quickly established himself as a go-to person in the product domains in which he has worked. He has been ever-willing to work with members of our organization to share his knowledge and expertise, most notably as a presenter for presentations on product functions.

What I find most engaging in Hamza's character are his wide-ranging interests outside of software. Two of his abiding interests are game theory and Artificial intelligence. His broad range of interests speaks well to his potential as a researcher, both in bringing a wide range of theory to the research at hand, as well as carrying forward new hypotheses of interest to software development. He is valued member of our organization whom we have learned we can rely on, regardless of the difficulty of the task to hand or the novelty of the challenge. His combination of intelligence, commitment, perseverance, creativity, and a compassionate character will certainly make him a valuable member of any program. I encourage you to look favorably upon his application.
